The anti-business climate of the U. S. Goveernment, Department of Justice, is misguided effort and uses Public funding. In my opinion the government should spend more time working toward borders, language and cultural matters-enforcing the constitution and using English as a standard language as is used for aircraft control. Microsoft is an enabler not an impediment to furthering U.S.A. D.O.J. should be focused on threats to people instead of focusing on the people and firms competing. Eliminate the anti-business approach in the D.O.J.
